

# BATTERY REPLACEMENT INSTRUCTIONS FOR CABLE MODEMS AND ONTs

## ONTs

### How do I know if the battery on my ONT needs to be replaced and what should be done to replace it?

*A Green indicator light on the battery (as shown in diagram) indicates that the battery is good. A red flashing light on the battery indicates that the battery is not connected or is bad and needs to be replaced.*

**NOTE: ONTs must be replaced by an ATMC Technician.**

*Please call 754-4317 if you wish to schedule a time to have your battery replaced.*
