---

*Effective March 9, 2023*

## **Standard-Definition Channels to be Replaced with High-Definition Equivalent on IPTV Cable System**

Effective March 9, 2023, all standard-definition channels that have a high-definition equivalent will be removed from the FOCUS Broadband IPTV cable system. No channels will be lost due to this change. The previous channel numbers that carried standard definition feeds will now carry the high-definition equivalent.

If you have a DVR, this change will only impact programs that have previously been recorded in standard-definition. Those recordings will be lost. Programs recorded in high definition will not be impacted. In addition, scheduled recordings do not have to be reprogrammed.

The removal of standard definition channels is being made because viewership of standard-definition channels is at an all-time low and most televisions are now high definition.
