

FOCUS Broadband Cable Update

Effective January 1, 2023

2023 MergeTV Rate Adjustments

FOCUS Broadband has been notified of significant cable TV programming cost increases that will be charged by local broadcast stations and national cable network providers starting in the new year. As we have said in the past, despite efforts to combat these rising costs, FOCUS Broadband has very limited ability to prevent these increases. Cable network providers will not allow companies like FOCUS Broadband to sell their channels a la carte. Cable network providers force carriage of unpopular channels bundled with their popular channels to drive higher revenue for themselves. If we refuse to package their content as they demand, these companies have no issue removing all their channels from our lineup. This tactic is not customer-friendly and puts FOCUS Broadband in a very vulnerable position. As a result of these cost increases, we must raise our rates for 2023. For more information on why cable TV rates continue to rise, visit www.tvonmyside.com.

We understand that price adjustments like these may have you considering dropping cable TV in favor of more flexible and affordable online streaming options. If you are interested in learning more about how you can discontinue cable TV and use FOCUS Broadband's Internet service to stream the content you want to see, visit www.focusbroadband.com/cutthecord.
