Getting Started Guide

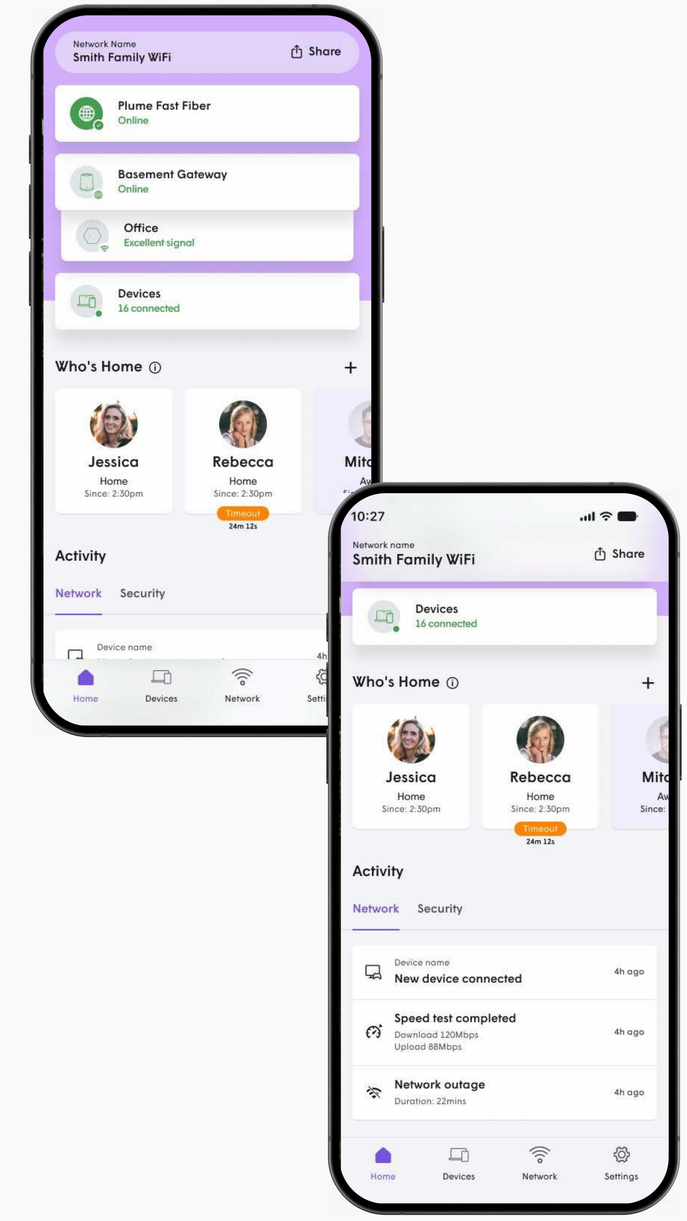

Plume Home gives you full visibility and control over your home network.

Here's how to get started.

Plume Home is the only app you need

- Set up profiles to manage access and security for people and groups
- See who's home and manage connected devices
- Prioritize bandwidth for specific apps, devices or people
- View security events, alerts and network activity
- Check your network status and connection health

Plume®

Home — Your network status, who's home and recent activity at a glance

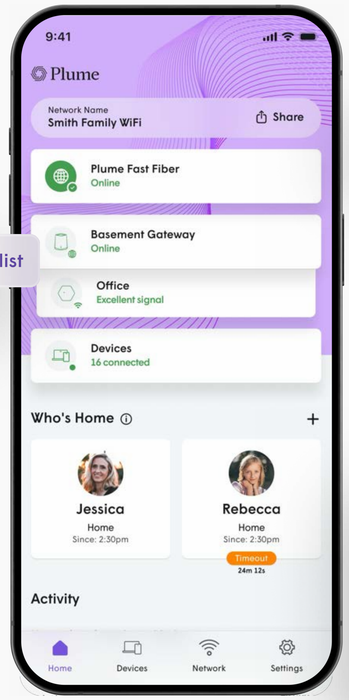

Devices — Every device on your network organized by person or group

Network — Manage security events, view usage stats, and configure network features

Settings- All network configuration and app preferences in one place

*Screens shown are for the iOS platform unless otherwise stated. Your screens may also vary depending on device and platform.

Taking action in the Plume Home App

Setting up a Profile

1. Open the **Devices** tab from the bottom navigation bar.
2. Tap the + button to create a new Profile.
3. Choose **Person** from the pop-up menu.
4. Enter the person's **First name** and **Last name.** (Option: Tap the portrait to add a photo. If no photo is added, initials will be displayed.)
5. Under **Personalize Protection** choose the content filtering and security settings for this person.
6. Tap **Next**.

Manage Devices and Profiles

1. Open the **Devices** tab from the bottom navigation bar.
2. Tap the 3-dot menu next to the device you want to manage.
3. Tap the action you want to take (timeout, boost, and more).
4. Filter devices to quickly find what you need.
5. Tap a Profile to choose whether to view it or take an action.

Plume®

Sharing Your WiFi Password

1. From the **Home** tab tap the Share icon on your network name tile at the top of the page. Swipe to see your secondary network.
2. A QR code will appear that any device with a camera can scan to join the network instantly.
3. Tap **Share a link** to send the SSID and password via any app installed on your phone.

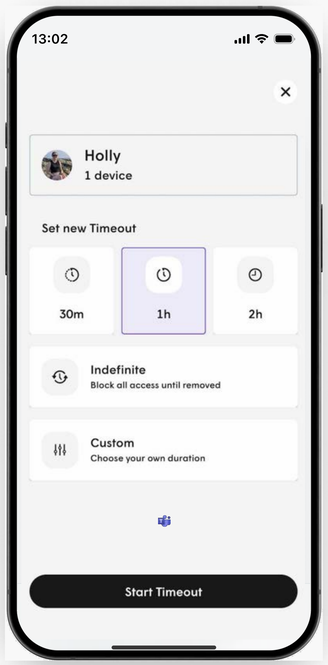

Setting a Timeout

A Timeout immediately pauses internet access for a person, group or individual device.

1. Open the **Devices** tab and select the Profile you want to apply a Timeout to.
2. Tap **Timeout** in the menu that appears.
3. Select the duration.
   - **30m, 1h** or **2h**
   - **Indefinite** — stays active until you end it manually
   - **Custom** — any duration from 1 minute to 23 hours 59 minutes
4. Tap **Start Timeout.**

End Active Timeout

1. Return to the Devices tab and tap the Profile you want to manage.
2. Tap **End Timeout**.

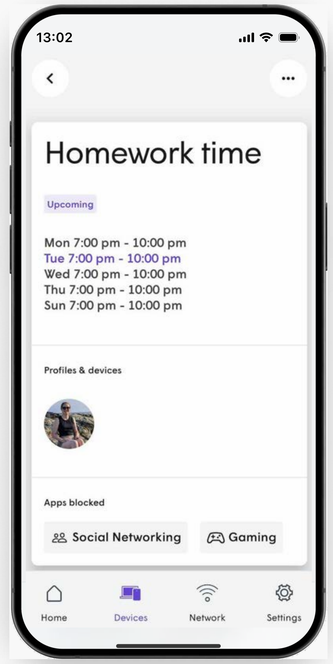

Plume®

Scheduling a Focus

A Focus blocks specific app access for a person or group on a recurring schedule.

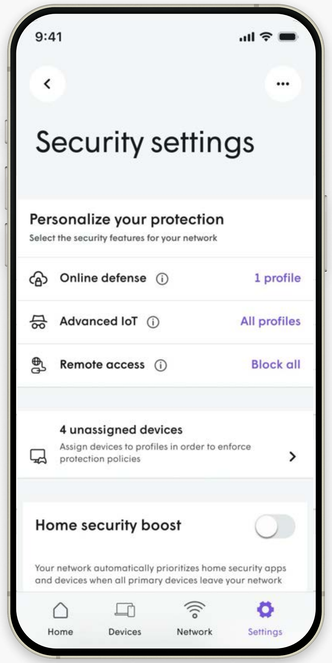

1. Open the **Devices** tab and tap the Profile you want to apply a Focus to.
2. Select **Focus**.
3. Enter a **Focus name** and tap **Next**.
4. Select what to block during this Focus.
   - **All** — blocks all internet access
   - **Custom** — blocks specific apps or app categories
5. Tap **Next**.
6. Select **Recurring** and set the start time, end time and days then tap + to save.
7. Tap **Create**.

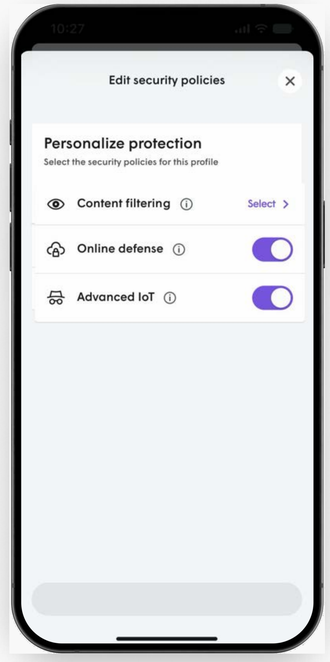

Configuring Security Settings

Security settings are applied per Profile and control what each person's devices are protected from.

1. Open **Settings** from the bottom navigation bar. Tap the **Security** tile.
2. Tap each feature to enable or disable it for specific Profiles or all Unassigned Devices.
   - **Online defense** — blocks malware, spyware and phishing
   - **Advanced IoT** — protects against unusual device behavior
   - **Remote access** — proactively blocks incoming connections
3. Select the Profiles to apply each setting to or tap Select all.
4. Tap **Save**.
5. On a **Profile Details** page, tap 3-dot menu to **Edit security policies** to personalize protection.
   - **Content filtering** — restricts content by age-appropriate levels
